

GMP facility

Pilot production for vaccine development

Intravacc has years of experience in production of GMP batches for phase 1 and 2 clinical studies of viral as well as for bacterial vaccines.

Intravacc is home to a GMP facility for production of vaccines on pilot scale. For Upstream Processing, we have bioreactors up to 100 liter; for Downstream Processing, we have all the required equipment at our disposal.

The GMP facility of Intravacc consists of a 100 m² class C/MLII cleanroom for active processes and 25 m² class C

cleanroom for inactive processes.

These cleanrooms are fully adaptable and can be equipped to comply to the required processes.

A dedicated Cleaning & Sterilization department supports this pilot plant.

Benefits

- Highly experienced partner for pilot scale GMP productions
- Own cleanrooms and cleaning and sterilization department
- Own QC, QA/QP and Regulatory Affairs departments

Track record:

In recent years, our GMP facility was used for such processes as:

- Neisseria seed lots for OMV production
- Polio seed lots type 1, 2, 3 Master and Working, pre-clinical and clinical lots
- Vero-G cell bank Master and Working
- RSVdG seed lot Master and Working
- nOPV2 concept 1B and 2A Master and Working Seed lot
- Shigella clinical trial material
- RSVdG pre-clinical and clinical lot

Intravacc

Intravacc is a renowned, not-for-profit R&D organization. With our unique capabilities and infrastructure, we are able to optimize vaccines, vaccine processes and vaccine technologies. Our aim is to increase equality in access to vaccines throughout the world in order to contribute to public health. We achieve this by transferring our knowledge and technologies to public and private partners worldwide and collaborative R&D. A team of 150 professionals is at your disposal at Utrecht Science Park Bilthoven in The Netherlands
